PROPER HOMECARE FOR PARTIAL DENTURES JOY LIQUID DETERGENT:

Use this daily to brush soft debris from your partial surface. This contains no abrasives, only cleansing soap. It is best to use a denture brush on your partial. **DO NOT USE TOOTHPASTE AS THIS CONTAINS AN ABRASIVE.**

UNDILUTED WHITE VINEGAR: Soak your partial overnight twice a week to remove the calcified (hard) deposits.

REMEMBER THAT YOUR PARTIAL SHOULD BE THOROUGHLY RINSED BEFORE YOU PLACE IT BACK INTO YOUR MOUTH. ALSO IT IS IMPORTANT TO REMEMBER THAT YOU MUST NOT NEGLECT TO CARE FOR YOUR NATURAL TEETH. IT IS BEST TO HAVE THEM CHECKED AND CLEANED BY THE DENTIST AND HYGIENIST ON A REGULAR BASIS. PLEASE DO NOT LEAVE YOUR PARTIAL OUT FOR A PROLONGED PERIOD OF TIME AS THIS MAY CAUSE YOUR TEETH TO SHIFT AND THE PARTIAL TO FIT IMPROPERLY.
